Professional Summary

Highly adaptable, results-driven **Lead / Principal Software Engineer and Solutions Architect** with over 25 years of experience designing robust backend architectures, high-concurrency cloud environments, and core web applications. Operates globally as an **Independent Contractor / Tech Consultant**, specializing in modernizing mission-critical legacy infrastructures into cloud-native architectures. Master of Science (M.Sc.) in Computer Science with extensive expertise in custom developer-tooling (code generators), API lifecycle management (Swagger/OpenAPI), and high-throughput data engineering. Deep production knowledge of **Java (up to 21) / Spring Boot 3.x, Go (Golang), and AWS cloud environments**, paired with a strong modern fullstack foundation in **TypeScript and Svelte 5 (including Svelte 5 Runes)**. Strong advocate for Clean Code, domain-driven design, and highly maintainable distributed systems.

Technical Skills

- **Backend & Cloud-Native:** Java (8, 11, 17, 21), Spring Boot 3.x, Go (Golang - standard library & CLI), ASP.NET, Node.js (REST/GraphQL).
 - **Cloud & DevOps (AWS):** AWS Lambda, SQS, SNS, S3, EC2, EKS (Kubernetes), Rancher, Docker, Apache Kafka.
 - **Databases & NoSQL:** Oracle PL/SQL, PostgreSQL, MS SQL Server, FirebirdSQL, DocumentDB / MongoDB, RDBMS Tuning & Architecture.
 - **API & Core Engineering:** Swagger / OpenAPI, Code Generation (Custom Tools & Scaffolding), System Architecture, SOLID Principles, Design Patterns, Clean Code.
 - **Frontend Ecosystem:** TypeScript, JavaScript (ES6+), Svelte 5 (Runes), Angular 2-5, UI Component Architectures (Bits-UI foundation), HTML5, CSS3, jQueryUi, Bootstrap, Materialize.
 - **Secondary Foundations & Data:** Python, GraphQL, PyTorch, TensorFlow, Pandas, Data Mining, Power BI.
-

Professional Experience

Mobilize Financial Services | Curitiba, Brazil

Senior Backend / Software Engineer (Production & Modernization) | Mar 2023 – Present

- **Framework & Language Upgrades:** Led the technical migration of transactional backend applications, upgrading core ecosystem frameworks from Java 8/11 to Java 17/21 and Spring Boot 2.x to 3.5.
- **Cloud Architecture & Containers:** Engineered and maintained scalable microservices leveraging AWS (EC2, RDS, SQS, SNS, S3, EKS) and Rancher/Docker to minimize production downtime.
- **Regulatory & Integrations:** Successfully delivered complex integration tracks with third-party software (e.g., Salesforce) and high-security compliance routines for OpenBanking / OpenFinance initiatives.
- **Multi-Engine Database Tuning:** Validated, optimized, and maintained mission-critical relational procedures (PostgreSQL, Oracle, MS SQL Server) and document-oriented queries (DocumentDB/MongoDB).
- **Cross-Platform Operations:** Extended team support bandwidth by actively handling technical troubleshooting and feature maintenance for corporate C# and ASP.NET applications.
- **API Standardization:** Implemented and enforced strict contract documentation utilizing Swagger/OpenAPI specifications to streamline cross-team service communication.

UTFPR (Universidade Tecnológica Federal do Paraná) | Curitiba, Brazil

Lead Fullstack Developer & IT Analyst | Jan 2009 – Oct 2024

- **Custom Code Generation:** Built specialized database-integrated scaffolding tools for automated code generation, accelerating the delivery of database triggers, Java DAO/DTO/POJO layers (JPA/validation), and TypeScript interfaces.
- **Core Frontend Refactoring:** Spearheaded a comprehensive rewrite of unstable legacy web interfaces (originally in Adobe Spry). Re-engineered the ecosystem into an optimized jQuery UI execution using HTML5, CSS3, custom themes, and smooth transitions, creating reusable UI components.
- **Backend Modernization & Security:** Transitioned monolith modules into asynchronous architectures using Java Spring Boot, Node.js (REST/GraphQL), and PostgreSQL. Authored a custom Java container proxy to enforce TLS 1.2+ security on legacy Oracle PL/SQL routing.
- **Tech Leadership:** Led agile development squads, managed API governance via Swagger, and mentored junior staff and interns under strict Clean Code guidelines.

Matur Contabil | Remote

FirebirdSQL DBA Consultant (Freelance / On-Demand) | Mar 2009 – Present

- Provided high-level database consulting, disaster recovery planning, infrastructure evaluations, and advanced query performance optimization.

Bonagura | Barueri, São Paulo, Brazil

Database Administrator & Infrastructure Consultant | *Dec 2006 – June 2008*

- Managed IT outsourcing risk analysis, heavy performance tuning, capacity planning, and hardware infrastructure lifecycles for complex BPO environments.

GeraSoft Informática | Apucarana, Paraná, Brazil

Senior Delphi Developer | *Jul 2002 – Sep 2005 / May 2008 – Jan 2009*

- Led legacy desktop software migrations, rewriting Clipper-based tax, financial, and payroll tools into Delphi paired with FirebirdSQL backend layers.
-

Infrastructure & Systems Engineering

- **Datacenter & Network Ops:** Data center capacity planning, logical and physical topologies, hardware lifecycle evaluation, IT budgeting, and disaster recovery planning.
 - **Systems Administration:** Virtualized Linux servers (Apache, MySQL, Samba domains, print and application servers), secure proxy integration, and secure enterprise network protocols.
-

Legacy Expertise & Core Foundations

- **Systems & Low-Level Languages:** Over 8 years of C/C++ development (primarily command-line tools for Linux ecosystems); 6 years of Turbo Pascal (DOS) and FreePascal (Windows/Linux).
 - **Enterprise Desktop & Web (Legacy):** Over 12 years of Clipper (from Summer '87 to 5.2) and Delphi (from v1.0 on Windows 3.1 up to Delphi 7); 6 years of Macromedia/Adobe Flex.
 - **Early Databases & Basics:** 5 years of DBASE II, III, and IV; 7 years of BASIC (Z80 ROM-BASIC, MS-DOS).
-

Education & Credentials

- **M.Sc. in Computer Science (Data Mining Focus)** – UNIMEP (2006 - 2009)
 - *Key Achievement:* Implemented a temporal version of the AprioriTid association rule algorithm written in pure ANSI C.
 - **B.S. in Data Processing Technology (Software Development)** – UNOPAR (2003 - 2004)
-

Professional Highlights & Community

- **Public Speaker:** Invited speaker for 6 editions of the Firebird Developer's Day (Brazil).
- **Active Contributor:** Core community member across major open-source database forums in Brazil, publisher of open-source packages (e.g., custom Svelte UI libraries based on Bits-UI).
- **Academic Collaborator:** Frequently invited to lecture on computer architecture, network protocols, and advanced software engineering.
